Hi,

I get the above error when I try to download the dataset. No option to join the competition appears when I go to the competition page. I am registered on kaggle with my @mail.mcgill.ca email. This was not a problem for the last project for me. I'm probably just being stupid but I'm not sure what is going on here.

Hi,

Are you accessing using the exact link in the assignment spec? I think you need to use that link or it will not let you register.

Best,

Will

I was not using the link. This solves the issue. Thanks!
